Subject: Green Beetle - Utah Building Stone & Supply - UPDATE

Lynn,

I received a call from Bill Bown on 8/14/00 regarding his concern over direction from John Blake of SITLA to perform reclamation of the Green Beetle project which is State Mineral and BLM surface. After some discussion (and my understanding of your position on this), I advised him to call John and discuss same with him.

Bill apparently did call John yesterday and discussed same. John called me back this morning and said if we and BLM were satisfied with the reclamation and revegetation, then he would be OK with same also. However, he said he'd be sending Bill a letter requesting a written notification from the BLM confirming same and releasing SITLA from any remaining liability.

I told John I would ask you to call him and explain your understanding and recent observations at this sight. I also left you a voicemail message on this as well.

Thanks,
Wayne
